

ABSTRACT

The invention provides a thermoplastic polymer composition which has both excellent heat resistance and chemical
5 resistance, and also has flexibility and excellent processability. The present invention is a thermoplastic polymer composition comprising a fluoro-resin (A) and non-fluorine-containing cured rubber (B), wherein the fluoro-resin (A) comprises a fluorine-containing ethylenic polymer (a), and the non-fluorine-containing cured rubber (B) is at least one
10 kind of rubber (b) which is at least partially crosslinked.
